

FOR YOUR TOP 100 - CLEANSER

**MOISTURISE WHILE YOU CLEANSE WITH FILORGA'S NEW
ANTI-AGEING FOAM CLEANSER**

Filorga Laboratories this year added a new anti-ageing foam cleanser to its world-renowned anti-ageing skincare range. The new cleanser goes well beyond simple make-up removal by not only providing a gentle purifying action, it also moisturises and plumps the skin and stimulates cell regeneration. In addition this skin cleansing role, it serves as an excellent eye make-up remover.

With its **mild cleansing agents**, Filorga's foam cleanser ensures that the physiological balance of the skin is preserved whilst cleansing, leaving the skin supple and hydrated. Enriched with **hyaluronic acid** for its anti-ageing and moisturising properties, the cleanser promotes the stimulation of cell activity leaving the skin hydrated and looking plump and smooth. High concentrations of **white lily extract** - recognised for its repairing and anti-oxidant properties, soothe and calm the skin whilst capturing free-radicals and fostering epidermal repair.

Due to its soothing and anti-ageing properties, Filorga's foam cleanser is suitable for all skin types including both sensitive and mature skin. Despite a high concentration of moisturising and soothing active ingredients, the skin is left with a soft, non-greasy feel upon rinsing. The skin is also left perfectly balanced, meaning that no toner is required.

Comments Filorga South Africa Medical Advisor, Dr. Riekie Smit, "Filorga's new foam cleanser is a fantastic new addition to the range because not only does it work as a gentle but effective cleanser, the hyaluronic acid and white lily extract provide a multitude of anti-ageing benefits too. This means that cleansing forms the first step of your overall anti-ageing routine."

The foam cleanser should be applied directly onto wet skin and worked into a rich lather with fingertips. Skin should be rinsed and cleansing can be repeated if necessary. For best results Filorga's foam cleanser should be used morning and evening and can be used for removing all traces of eye make-up too.

Retail price: R 285.00 for 150ml
